Demographics

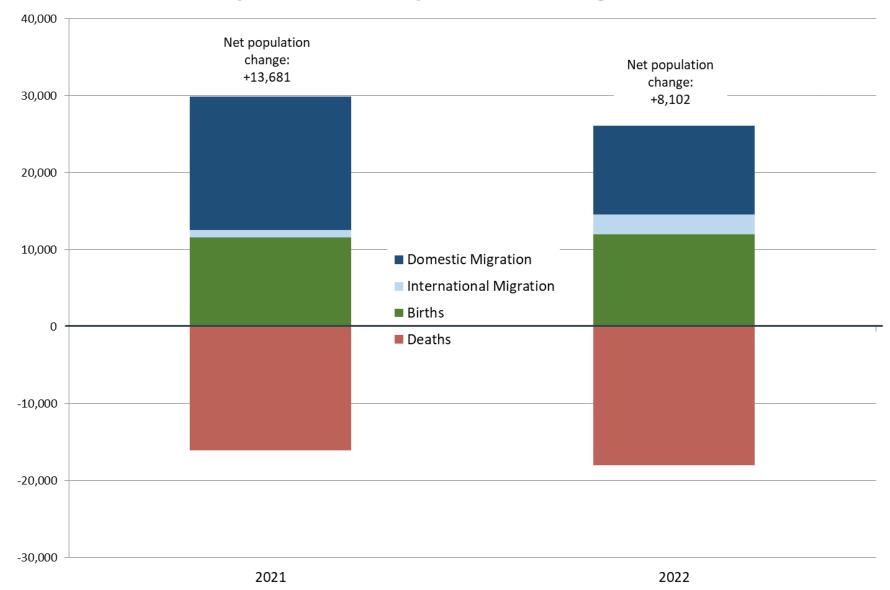

Components of Population Change, Maine

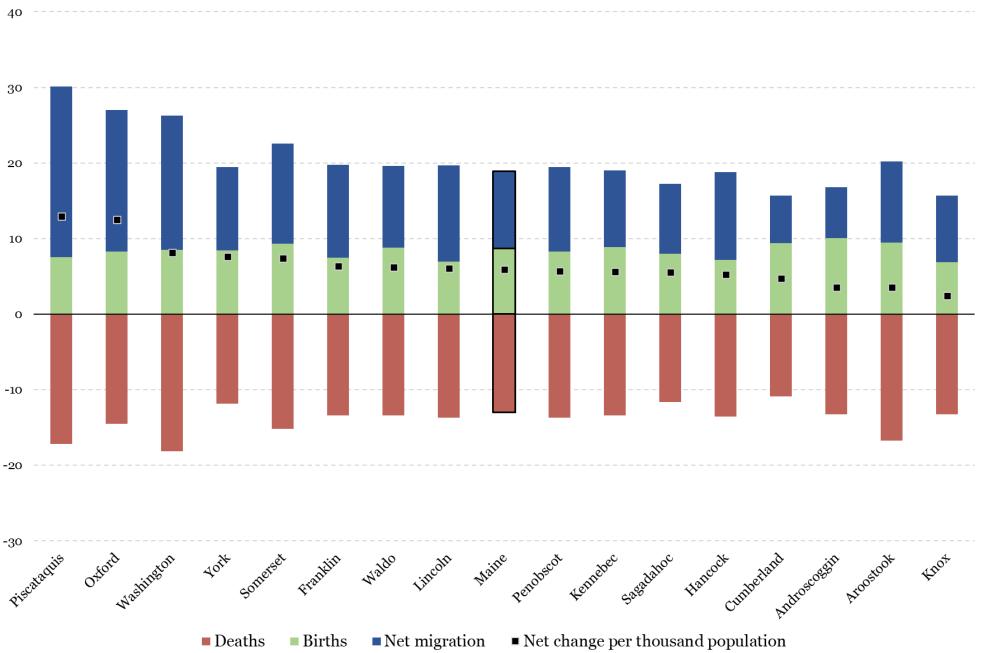

Population increase of 2.6% from 2010-2020 (42nd in U.S.)

Population increase of 1.7% from 2020-2022 (14th in U.S.)

2022 net migration = 10.2 per thousand (11th in U.S.)

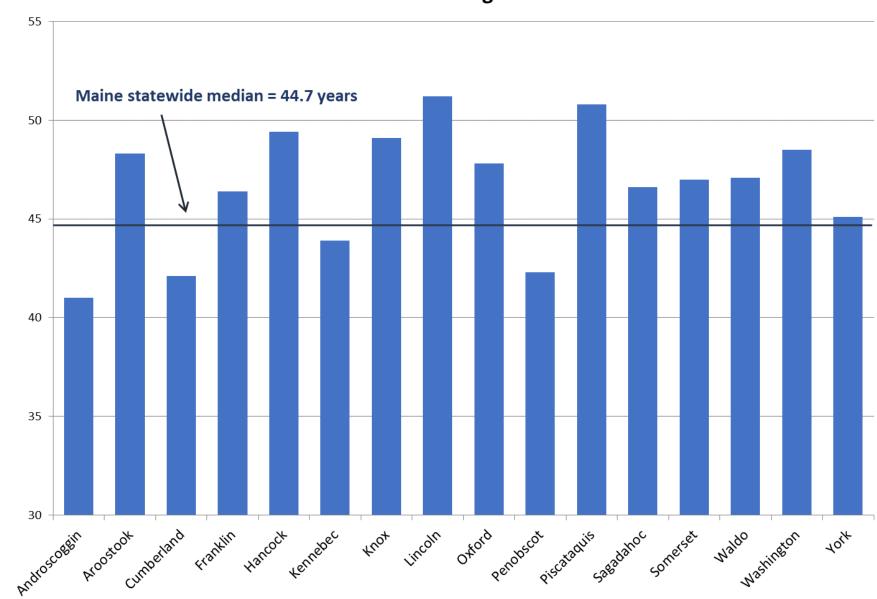

Median Age

Maine has the oldest population...

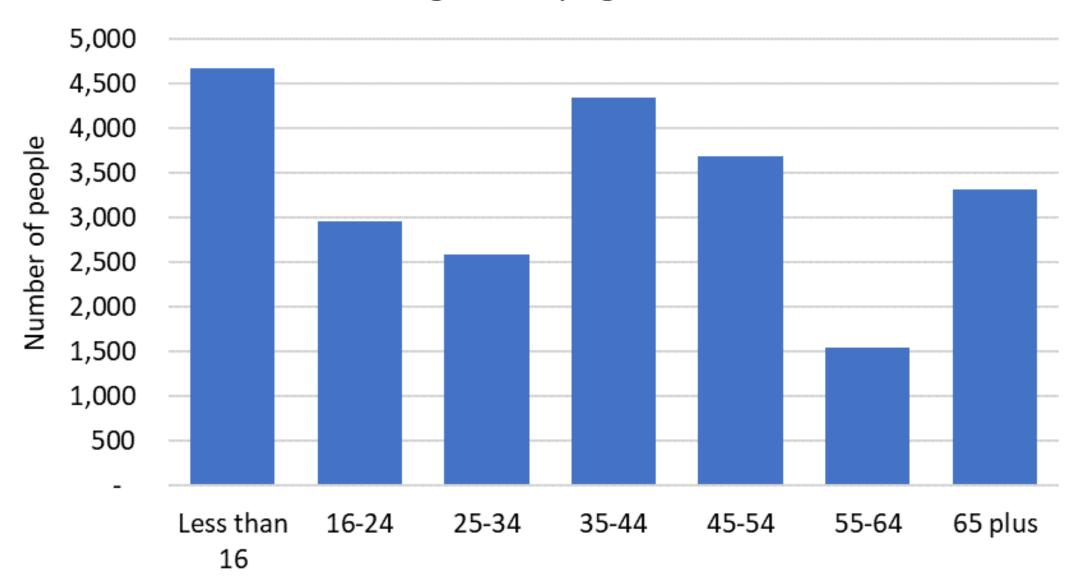

...by median age (44.7 years) ...and by % of population age 65+ (21.7%)

BUT!

Maine was the ONLY state in the U.S. to see a decrease in median age from 2020 to 2021

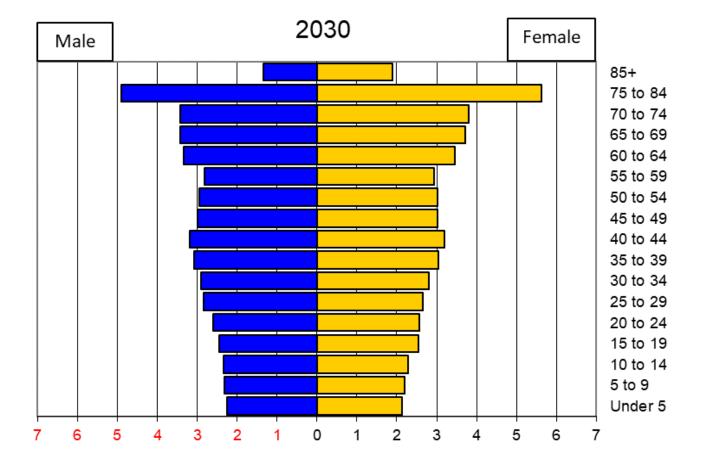

Net Migration by Age Cohort

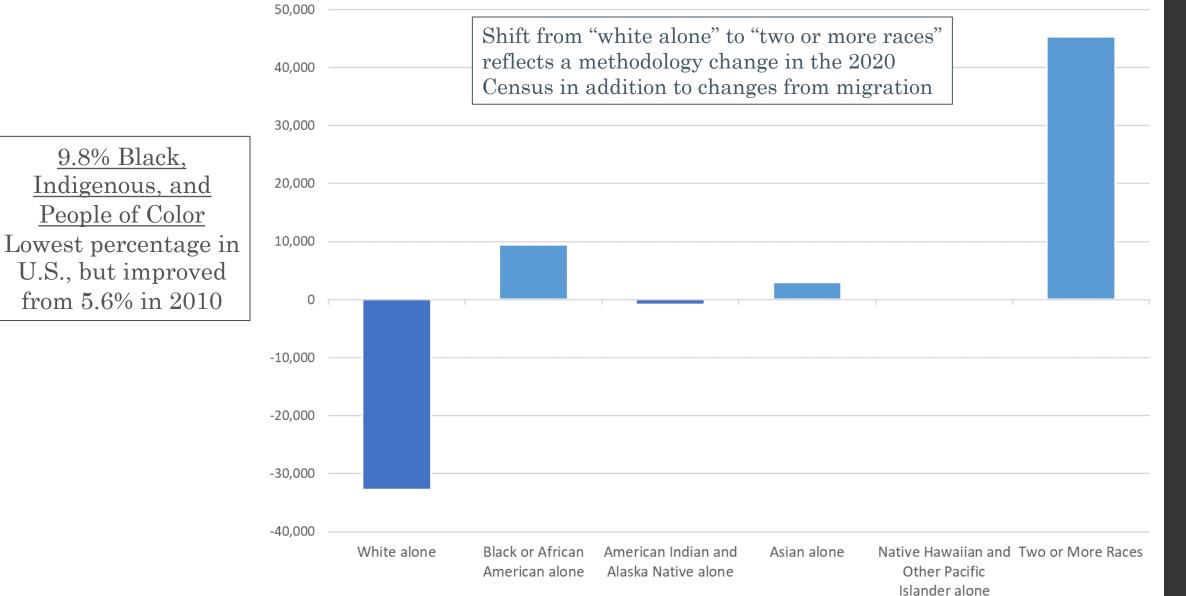

The Baby Boom: 1946-1964

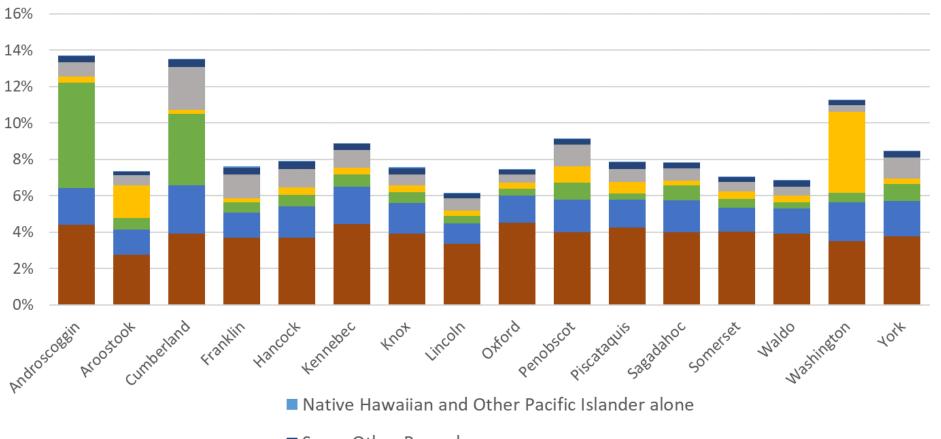

Baby Boom generation in 2030: age 66-84

Baby Boom generation in 2021: age 57-75

Change in Maine Population by Race, 2010-2020

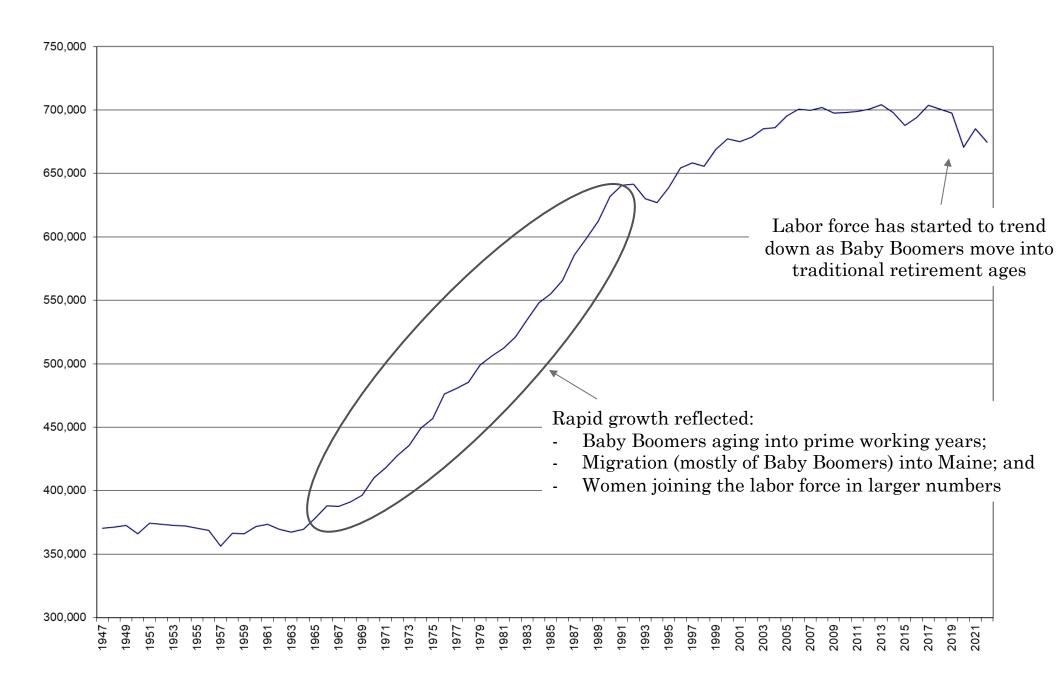

- Some Other Race alone
- Asian alone
- American Indian and Alaska Native alone
- Black or African American alone
- Hispanic or Latino (any race)
- Two or more races

Date

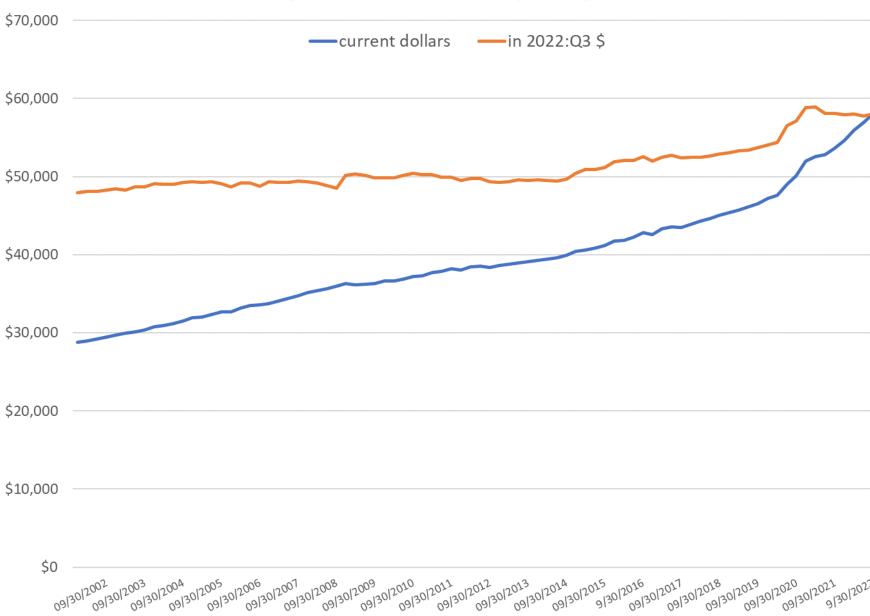

Total Nonfarm Employment (in thousands) History and CEFC forecast

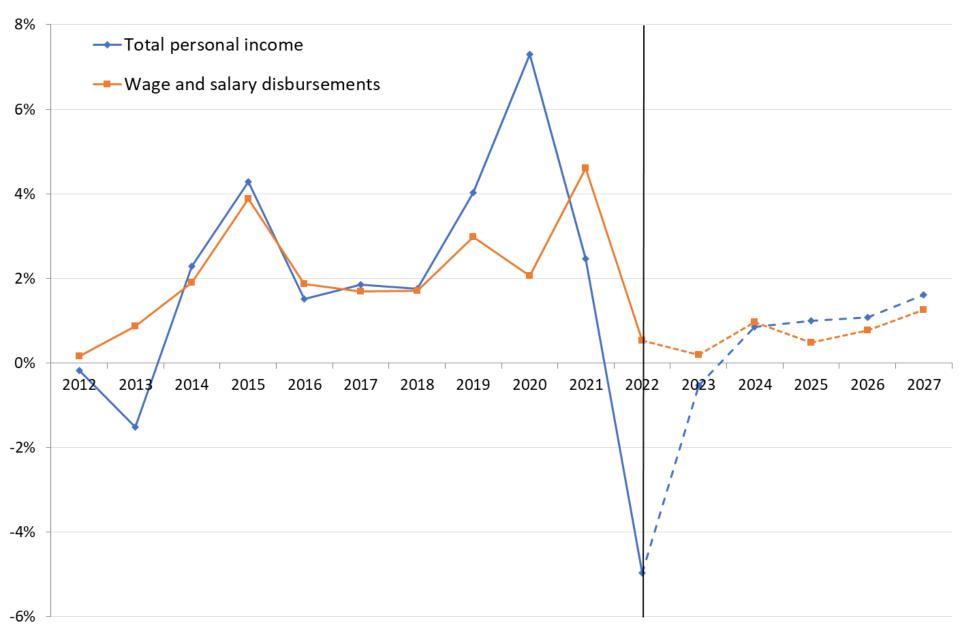

Wages, Income, and Inflation

Moving Four Quarter Average Wage Per Job

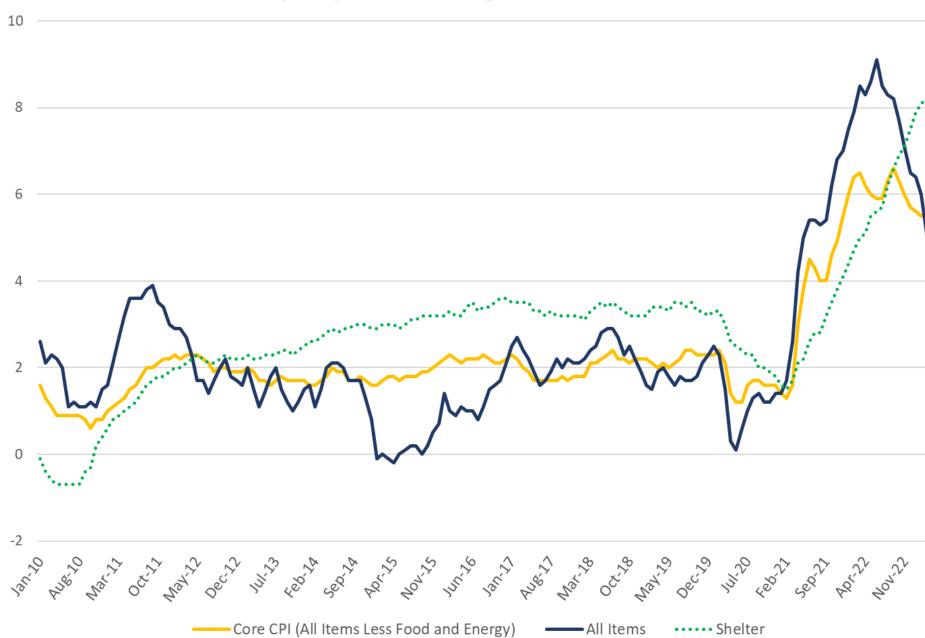

Wages have increased sharply over the past two-plus years, but higher inflation has flattened out recent gains

Percent Change in Real Personal Income (2022 \$), Maine 2012-2022 and forecast to 2027

Year-over-year percent change in Consumer Price Index

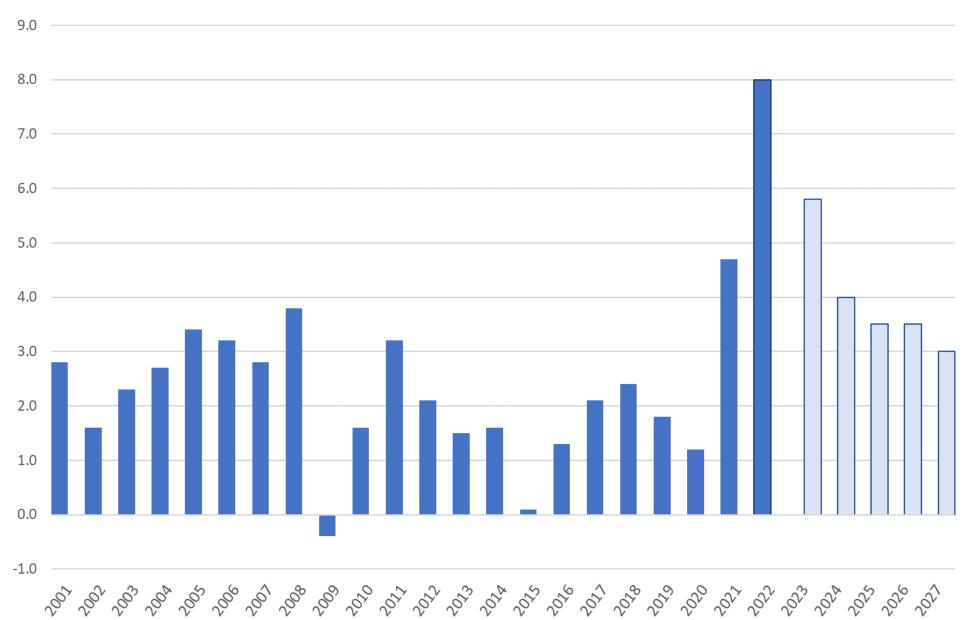

What does this mean for interest rates?

Current target range: 5.0% to 5.25%

"The Committee will closely monitor incoming information and assess the implications for monetary policy. In determining the extent to which additional policy firming may be appropriate to return inflation to 2 percent over time, the Committee will take into account the cumulative tightening of monetary policy, the lags with which monetary policy affects economic activity and inflation, and economic and financial developments.."

- Excerpt from May 3, 2023, Federal Open Market Committee statement

Year-over-year percent change in Consumer Price Index; 2001-2022 historical and 2023-2027 forecast

Outlook

Consumer Sentiment and Small Business Optimism Indexes

Inflation has been a major contributor to the downward trend in small business and consumer sentiment; higher expenses continue to bring down these indices

Select key assumptions from April 2023 CEFC report (emphasis added)

- There is an unequal distribution of supply and demand in the labor market. Demand for labor is high, supply is low, and unemployment rates are near historic lows in Maine and nationwide. Workers are experiencing higher wage growth, particularly for lower wage jobs. Some demographic trends, including a growing share of the population reaching retirement age, will continue to constrain labor supply. However, the Commission is optimistic that Maine will continue to see higher inmigration of working-age people in the coming years that will be more than sufficient to offset retirements in the forecast period.
- High inflation and interest rates have continued into 2023, though there have been improvements in some sectors, notably the energy sector. The Federal Reserve is expected to continue pursuing policies that will constrain inflation, but inflation risks are likely to take several years to fully ease.
- Rising interest rates, low supply of available properties, and ongoing in-migration are continuing to impact the housing market. Home sales are down, while sale prices have continued to increase. Affordability is of particular concern as more potential buyers to be priced out of the market. Higher home prices have contributed to higher rental prices.

Things to keep in mind:

- Housing costs have increased sharply as demand far outstripped supply and then
 interest rate hikes made mortgages more expensive this limits availability for ongoing
 migration and workforce expansion
- Inflation has started slowing, but not quickly the Federal Reserve has continued to raise interest rates in response
- Will we see continued migration into Maine? Telework, housing, and childcare are three key determinants
- Immediate threat of recession seems to have faded, but uncertainty remains elevated and there is still a chance of "slowdown" or "pause"
- Maine has a robust Budget Stabilization Fund (around \$900 million) and spending from Maine Jobs and Recovery Plan is ongoing, which will help Maine weather a potential slowdown
