

My Summer as an Intern

Sydney Gamage

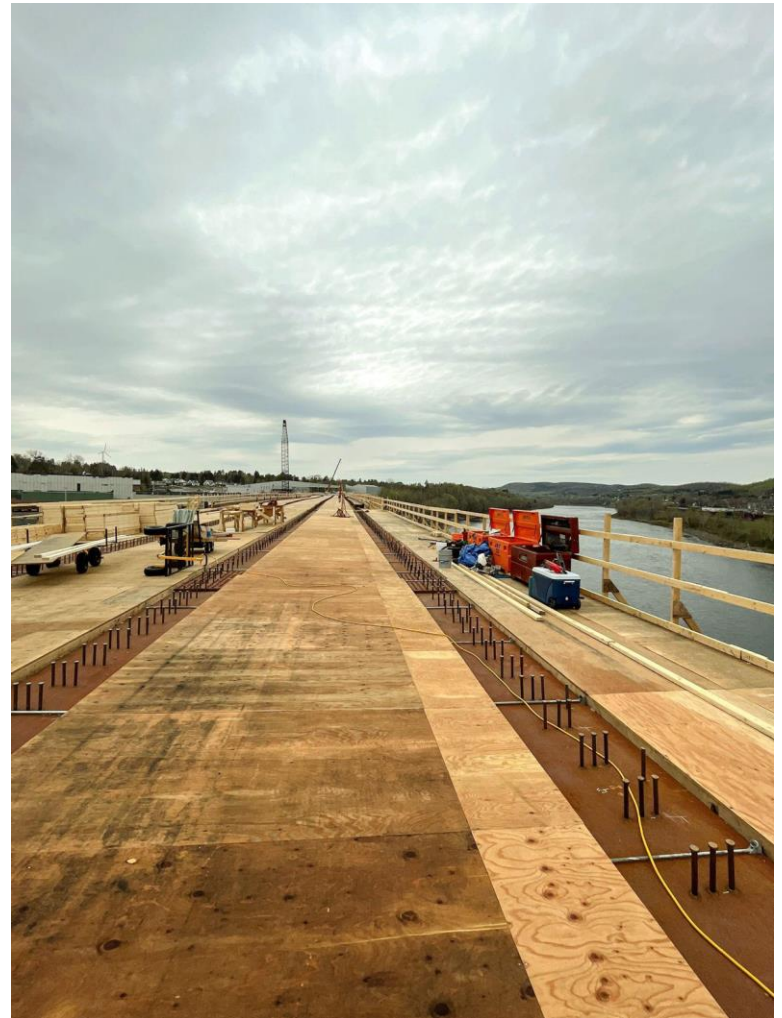

My position

- Quality control on rebar, form work, and concrete/ concrete elevation.
- Read plans in the office, then applied what I learned in the field
- Field Surveying
- Documentation
- Practiced testing concrete

Challenges

- Being the only girl on the crew when I arrived.
- Showing up late into the project
- Language barrier with sub crews

Challenges on site

My first concrete placement I was apart of I had to winch our screed to the end of the placement.

Learning our chamfer on the bulkhead had been placed in the wrong spot

How do we place
concrete on a bridge
80 ft above water?
